Market Outlook

Until the end of the first quarter of 2022, the deposit rate is still on the downtrend channel. That happens in almost all banks in Mandiri Investasi bank universe in KBMI 1,2 and 3, while KBMI 4 is already very low level. Banks are keen to stream the credit with a low-interest rate environment amidst the recovery because of the lower credit risk. Domestic banks hope by providing low-interest rates it can help the domestic economy to recover faster and broader. Loan growth improved in February 2022 to 6.3% yoy from 5.5% yoy in January. We are glad that the demand for loans can grow because bank loans can help a lot of people to start reopening or expanding their businesses again. We think with the current declining trend of deposit rates from banks, money market funds are better off for investors to have a better return due to the higher yield gained from money market bonds.
